# About the Kids Count indicators

## FAMILY/COMM ECON WELL-BEING

### Child poverty

Children 0-17 who lived below poverty during the year

— U.S. Census Bureau —

Children growing up in poverty (defined here as \$23,850 for a family of four) are much more likely than peers to experience stress and deprivation that hinders development and readiness for school and life.

## FAMILY/COMM ECON WELL-BEING

### Unemployment

Individuals 16 and over in the labor force but unemployed

— Iowa Workforce Development —

High levels of unemployment in a community make it difficult for families to move up the economic ladder. It also contributes to family stress when a parent struggles to find work.

## SCHOOL READINESS & SUCCESS

### Preschool participation

Children ages 3-4 enrolled in preschool

— U.S. Census Bureau —

Children who participate in a high-quality preschool program are more likely to be socially and cognitively ready for kindergarten. The benefits are strongest for low-income children and children facing other risk factors.

## SCHOOL READINESS & SUCCESS

### 4th grade reading

Students proficient on the Iowa Assessments and Iowa Alternate Assessment

— Iowa Department of Education —  
Reading proficiently by mid-elementary school is an important predictor of future academic success, including high school graduation, and of economic stability in adulthood.

## SCHOOL READINESS & SUCCESS

### 8th grade math

Students proficient on the Iowa Assessments and Iowa Alternate Assessment

— Iowa Department of Education —

Proficiency in math by the end of middle school prepares students for higher-order math classes they will need to succeed in high school as well as the basic skills needed for adult life.

## SCHOOL READINESS & SUCCESS

### High school graduation

Public school students entering 9th grade who graduate with their class 4 years later

— Iowa Department of Education —

A high school diploma is the baseline credential needed for higher education, most kinds of job training and many jobs. Adults without one are much more likely to struggle economically.

## STABLE, SECURE FAMILIES

### Teen births

Females ages 15-19 giving birth

— Iowa Department of Public Health —

Children born to teen mothers are more likely to be born prematurely or low birth-weight and to die as infants. Teen mothers are less likely to finish high school or go on to college and more likely to rely on public supports.

## STABLE, SECURE FAMILIES

### Teen unmarried births

Live births that are to unmarried teens

— Iowa Department of Public Health —

Unmarried teen mothers are less likely to ever marry and often face the primary responsibility of parenthood, often without the full physical, emotional and financial resources needed for child rearing.

## STABLE, SECURE FAMILIES

### Single-parent families

Families with children that are headed by a single parent

— U.S. Census Bureau —

Children in single-parent families typically do not have the same economic or human resources available in two-parent families. They are more likely to drop out of school and experience divorce in adulthood.

## STABLE, SECURE FAMILIES

### Child abuse & neglect

Confirmed cases of child abuse or neglect among children 0-17

— Iowa Dept. of Human Services —

Experiencing abuse or neglect is one of the adverse childhood experiences that hinders healthy development — physical, mental and cognitive — and can affect well-being far into adulthood.

## HEALTHY CHILDREN

### Prenatal care

Live births where prenatal care began in first trimester

— Iowa Department of Public Health —

Early and regular prenatal care — when a health care provider can treat and prevent health problems early — increases the chances of a healthy pregnancy and birth.

## HEALTHY CHILDREN

### Low birthweight

Live births weighing less than 5.5 pounds

— Iowa Department of Public Health —

Infants born at low birth weight are at higher risk for physical and developmental delays that hinder growth, school readiness and adult health.

## HEALTHY CHILDREN

### Infant mortality

Deaths of infants before age 1 per 1,000 children

— Iowa Department of Public Health —

In addition to being a child outcome, data on infant mortality is used as a proxy for population health. The many factors that shape population health also shape infant mortality rates.

## HEALTHY CHILDREN

### Child deaths

Deaths of children ages 1-14 per 100,000 children

— Iowa Department of Public Health —

Child death rates can point to underlying problems and inequities within a community, such as the safety of neighborhoods, access to health care or exposure to environmental toxins.

## HEALTHY CHILDREN

### Uninsured children

Children 0-18 who are uninsured during the year

— U.S. Census Bureau —

Health coverage is the key that opens the door to the health-care system. Insured children are more likely to get timely medical care, including well-child visits, that contributes to overall health.

## ACCESS TO PUBLIC SUPPORTS

### WIC Program

Children 0-4 participating in the Women, Infants, & Children program

— Iowa Department of Public Health —

WIC offers supplemental foods, referrals and nutrition education for low-income pregnant and postpartum women and children through age 4.

## ACCESS TO PUBLIC SUPPORTS

### Free or Reduced-Price Lunch

Students eligible for free or low-cost meals while at school

— Iowa Department of Education —

This federally funded program provides meals to students. Available to families with incomes up to 185 percent of the federal poverty level, it is a commonly used proxy for poverty.

## ACCESS TO PUBLIC SUPPORTS

### Food Assistance

Monthly average of individuals receiving Food Assistance

— Iowa Dept. of Human Services —

The Food Assistance Program (known nationally as SNAP) provides financial assistance that low-income Iowans, including many children and working adults, can use to buy groceries.

## ACCESS TO PUBLIC SUPPORTS

### Family Investment Program

Monthly average of individuals participating in FIP

— Iowa Dept. of Human Services —

Iowa's version of the federal TANF program provides cash assistance to eligible low-income families for up to 60 months. It serves a small and shrinking share of the population.

## ACCESS TO PUBLIC SUPPORTS

### EITC

Individual tax filers who receive the Earned Income Tax Credit

— Internal Revenue Service —

The EITC is recognized across the political spectrum as a successful antipoverty program that ensures that people who work are able to provide for their families.
